As you may know from our Twitter, Slack and other channels, last Thursday we were presenting at Plug and Play Summer Summit, in front an audience of a few hundred people. We've got overwhelming response and with this post we'd like to thank our friends at P&P. Their program is one of the best for startups, because it's free and non-dilutive. Instead of taking equity in your company they charge their corporate partners that benefit from connecting with startups and entrepreneurs.

We will post the video of the pitch in the next few days, but what we know is that it generated a lot of interest amongst travel companies. As of today, we've talked to all the travel companies at P&P and we're already talking about selling Líf tokens to some of them.

Generally, the companies (not just P&P partners) that we talked to are divided into these categories:

1. These companies understand that blockchains are fundamentally designed to remove middlemen, therefore they understand the idea right away. Rent-seeking business models must go. This is our target group.

2. Companies from this category “already use blockchain”. When challenged, they reveal that they’re working with a consultancy company on things like user identity and loyalty programs. They don’t understand the value of public permissionless blockchains. Our goal is to educate these companies.
3. The third group wants to see the benefit of using our platform right away. They want some short-term gains. The reader knows that we’re building a B2B marketplace and for you it’s obvious that we have to build critical mass (in certain locations first, then globally). We believe that with a new technology like blockchain, there will be no short-term gains. For any big company (such as an airline), any project that would aim to optimize an internal process will take years to come to fruition, especially if it uses a new technology that hasn’t been tested in production.
4. The fourth group thinks blockchain is equal to bitcoin.

Overall, it’s great to see that more and more people and organizations understand the blockchain technology. And if you are working on a travel startup and you would like to connect with the companies below, please consider applying for Plug and Play Technology Center program:

- Lufthansa
- TUI
- Travelport
- Turkish Airlines
- Copa Airlines
- Deutsche Bahn
- Carlson Wagonlit Travel
- Datalex
- IATA
- Accor Hotels

- JetBlue
- Swissport
- etc.

P&P also supports [Travel Tech Con](#), a community of travel startups in San Francisco and they are quickly expanding their reach, they already have offices in Europe and Asia. Apart from travel they also have a number of other verticals that they work on, such as Bitcoin, IoT, retail, etc.

Feel free to ask any questions about P&P and what we're building at [Winding Tree](#) at our [Slack channel](#).
