Winding Tree Token Sale is LIVE NOW

Token Sale Page: <https://lif.windingtree.com/>

- Winding Tree ICO (Líf Token Generation Event) will take place from February 1 (8am UTC) to the end of February 14th. Price: first week of February 1 ETH = 1000 Líf, second week 1 ETH = 900 Líf.
- Note that your contribution is only accounted when it reaches our smart contract. Therefore, if you wait till the last hours to get 1000 Líf for 1 ETH

— network congestion may delay your transaction which may result in you buying at only 900 Líf for 1 ETH rate.

- Here is a **FAST TRACK GUIDE** for experienced contributors who don't need guidance. If you want a thorough guide — keep reading.
- To get notified when the token sale starts — **subscribe to our newsletter** and **join the community**.
- Questions? Check **FAQs**. Seriously, check FAQs, chances are we have already covered your question there.

Quick Overview of Winding Tree

Here We Go. Step-by-Step.

STEP 1 — Set Up MyEtherWallet on desktop or Cipher on mobile

Instructions are **here**. You can also use other wallets that support **ERC-20 standard**. **Important: DO NOT contribute from an exchange wallet!!!**

STEP 2 — Buy ETH from an exchange

If you don't own ETH yet — you'll need to buy ETH from an exchange before contributing to Winding Tree ICO.

STEP 3 — Send ETH from exchange wallet to your MEW wallet

Once you have ETH in your exchange wallet — send it to your MEW wallet address (here's how you'd do it via Coinbase exchange for example)

Skip steps 1 & 2 if you already have your ETH ready to go in your MEW or other ERC20 supporting wallet.

Reminder: DO NOT send your ETH to Winding Tree directly from an exchange wallet!!!

STEP 4 — Go to Token Sale page: <https://lif.windingtree.com>

STEP 5 — Create account

On token sale page enter your email address to create an account. Only those contributions **coming from registered accounts** will be accepted, so make sure you register before sending your contribution.

Check the checkbox that confirms that you're not a US resident. Please note that due to US regulations US residents won't be able to participate and we will be using geo-fencing on token sale page to enforce that.

STEP 5 — Register your contribution

Once you enter your email address, we will send you an email with a link to register your contribution. Click the link and continue to filling in the form. You will be required to provide your name, address, telephone number and your ETH wallet address from which you will be contributing.

Please make sure you **double check that the wallet address you're registering is correct** — that's how we will account for your contribution during token distribution.

STEP 6 — Copy Winding Tree ICO address

Once you register your contribution you will see Winding Tree ICO address where to send your contribution. **Copy this address**, you will need to paste it into the transaction form in MEW later.

As a reminder — if you share this address with someone else and they send ETH to this address without registering an account first (STEP 5) — their contribution will be rejected, so ask them to go through the proper process instead.

STEP 7 — Complete KYC if contributing 15 or more ETH

You will also see a KYC form asking for ID verification on this token sale page. KYC is only required for contributions of 15 or more ETH. KYC process will require you to provide the following: scanned image of a government issued ID, a selfie and proof of address.

Please note that the transactions of 15 or more ETH that don't have KYC completed will be **rejected at the end of the ICO**.

If you know you are going to send 10 or more ETH — you can do KYC right away on the token sale page to expedite the process.

Otherwise, what's going to happen is: once you submit the form we will start pinging the network for transaction status from the ETH wallet address that you provided and when the transaction is complete and it's 15 or more ETH — we will send you a follow up email directing you to complete the KYC. Therefore, completing KYC right away will save you time and you won't have to worry about your transaction being rejected in case you missed that follow up email or forgot to get back to it.

STEP 6 — Send your contribution

Go to your MEW wallet and send ETH to the ICO address using minimum gas price of 4 Gwei and 100,000 gas limit.

STEP 7 — Verify transaction

Verify your transaction — copy your wallet address, enter it in the search field on [Etherscan](#) and see the status.

STEP 8 — Get your Líf

Líf will be distributed in the course of 7 days after the end of the ICO (February 15) and will be sent to the same wallet address from which you sent your contribution.

STEP 9 — Get Líf on exchanges

We will be announcing the exchanges where Líf will be available after the Token Generation Event, follow the updates via [newsletter](#).

STEP 10 — Stay in the loop

Follow Winding Tree platform development progress via our [newsletter](#), check out our [Open Source](#) and if you want to get early access to the platform — [signup here](#).

. . .

A Little Extra Help

See below KYC troubleshooting, failed transaction troubleshooting and our security recommendations.

KYC Troubleshooting

If identity verification fails — most common reasons are:

a) invalid / expired document or document not matching the name of the contributor.

b) poor quality of the image — blurry, with light reflection or otherwise unreadable.

c) missing either the front or the back of the document.

d) document being covered by fingers or other objects.

e) selfie of poor quality, wearing glasses, hats or any other accessories.

Fix any of the above and re-upload.

Transaction Troubleshooting

If your transaction is rejected — most common reasons are:

a) Not enough Gas limit— increase to our recommendation and try again.

b) The crowdsale hasn't started or has ended.

c) Contribution was made from a non registered account (STEP 5)

d) Troubleshooting via Jaxx and MEW.

YOU and only YOU are responsible for your security.

- With ETH wallets and other services — always check that these sites have **Security Certificate icon** in the browser address bar, even better — just **bookmark** them so that you don't accidentally land on a scam site that looks similar to the original, but is intended to phish your data. Always double check that the site is the the original **before** entering any of your data.
- Do not trust messages or links sent to you by random people via email, Slack, Reddit, Twitter, etc. Every single team member of Winding Tree will **ALWAYS** have @windingtree.com email address and will have ***Admin** tag on Telegram and RocketChat when posting messages. Also,

we will **NEVER** text you or send you private messages on social channels that urge you to click a link. All our communication will be happening via official Telegram, RocketChat, Newsletter coming from @windingtree.com email address and publicly on official Twitter and Facebook page. We **do ask you** to report any suspicious communication to our team on Telegram.

. . .

As always, Winding Tree team is available for your questions on Telegram and RocketChat and FAQ page has a lot of answers. Here are the team members on Telegram who will be happy to help you before and during the ICO:
