1 min read · Oct 8, 2018

This last week we focused our efforts on developing a simple non-crypto booking mechanism. We essentially found a way on how to move booking information from a traveler to a hotel. We defined it as a data protocol that you can see more on [here](#), it will work over a traditional REST API. We are currently preparing an example implementation of it that you can see [here](#).

Thank you for your continued support and patience! If you have any questions, join our [Telegram](#), technical discussion should go to our [Google Group](#). If you want to contribute, a good place to start is [GitHub](#) or our [upcoming hackathon](#)!
