We did a **reset of our demo and playground environments** on Friday the 16th. You can see more on why we did that [here](#). This is something that will be done periodically as we make updates to the protocol

We update our **Swarm** node to the latest available [version 0.3.6](#).

We are continuing to work on and make progress with a sample and simple booking form in the **hotel explorer**. You can see the latest on what is going on with that [here](#).

We just published **WT Airline proposal** for generalization of the Winding Tree platform so that it can accommodate not just **hotels** but also **airlines**. Feedback from our community is very welcome — check out details [here](#) and talk to us directly [here](#).

Thank you for your continued support and patience! If you have any questions, join our [Telegram](#), any technical discussion should go to our

Google Group. If you want to contribute, a good place to start is our GitHub.
