We have some interesting and exciting updates for this last week.

We have created a visual demo of our [Search API](#), which is ready for you to play around with, please keep in mind this is a technical demo to showcase functionality. You can take a look in our Playground Explorer in *Search on a map* page. This implementation can be found in this [pull request](#). We have more in the pipeline and we had some interesting [ideas](#) that came up while we were implementing the map.

We are progressing with our booking process and we introduced a booking tool that can be seen [here](#). It's now possible to have it in a pending state or you can cancel it. It's not yet live but we will get it merged in the near future.

We are having a lively and engaging [discussion](#) about our Airline proposal and we are already working on some changes based on the new information we have gathered there.

One of our team members, Hynek, has left to pursue other ventures. We appreciate all of his contributions to the platform thus far. We are happy to be welcoming [Ondřej](#) on board as a replacement and we are excited for the contributions he will bring to the team.

Thank you for your continued support and patience! If you have any questions, join our [Telegram](#), any technical discussion should go to our [Google Group](#). If you want to contribute, a good place to start is our [GitHub](#).
