Swap .online

We are excited to announce the listing of the LIF tokens on the decentralized cross-chain wallet with built-in Atomic Swap exchange, [Swap.online](#). Their Atomic Swap feature will enable users to exchange cryptocurrency from one form to the other without the need for a trusted third-party.

Swap.online is a leading cross-chain exchange for P2P exchange for blockchain assets. With Swap.online, users can exchange cryptocurrencies for Bitcoin, Litecoin, Ethereum, Bitcoin Cash, and EOS blockchains without to trust a third party. Users will be able to safely store and exchange on their own privately owned wallet. The Swap.online platform does not store user's private keys on their servers or back-end. You can see more details about their exchange here.

We are happy to have LIF listed on their exchange and compatible with their wallet as they are a decentralized and opensource project similar to our own.

Thank you for your continued support and patience! If you have any questions, join our Telegram, any technical discussion should go to our Google Group. If you want to contribute, a good place to start is our GitHub.
