Here are our highlights from 2018 — platform development, new partners, community building and more.

Winding Tree 2018 Year in Review

Platform Development

- In 12 months we went from early concepts to several solid product directions: Hotel Explorer (Booking API), Search API, Airline Explorer (Airline Architecture & API) with major functionality built around them.
- Our supporting projects include Crypto Booking app, a token standard, distributed storages, 2nd layer solutions, payment processing, UI

framework and others.

- We're currently ahead of schedule with major initiatives planned for 2019 having already started in 2018.
- In Q4 we started a new edition of Weekly Developer Updates and published 12 updates so far.

Partners

- 15+ new partners including major airlines like AirFrance-KLM and Air Canada, hotels like Nordic Choice and CitizenM, technology partners like Sciant and Siesta Cloud.
- In October, we organized and led the first industry roundtable with major partner airlines — an open innovation initiative to promote and support cross organization collaboration, open source development and solving real world industry pain points via collective intelligence and active participation.
- Throughout 2018 we organized and led four in-depth partner workshops to exchange expertise, understand partner organizations' technical needs and challenges and to kick off active collaboration.

- Apart from existing partners, over 200 travel organizations are on our list of early adopters willing to work on integration as early as possible.

Community

- In October, during Prague Blockchain Week, we organized and hosted our first #Hack Travel hackathon bringing together airlines, hotels, industry experts, travel startups and blockchain enthusiasts to work together on open source solutions for a variety of industry challenges.
- At the hackathon over 120 hackers and business leaders representing 20+ countries and 50+ travel organizations collaborated on what we now call the first 12 projects built entirely by our community using Winding Tree technology.
- In June, during Travel Tech Con, we organized and led the first open workshop on blockchain based distribution for our community of travel startups and industry experts.
- In 2018 we drastically increased involvement of the community in making Winding Tree product decisions, including opening up our platform improvement proposals for the community, launching public

technical discussions and kicking off collaboration with airlines on the upcoming Proof-of-Concept.

- Our Telegram community grew 50x organically and Twitter audience bumped up to 5k with top tweets successful conclusion of ICO and partnership announcement with AirFrance-KLM

Events & Acknowledgements

- Winding Tree team participated and gave 40+ talks on decentralized distribution at major technology events including CAPA Aviation Summit, Devcon, Dreamforce, HTNG, IATA Aviation Data Symposium, Phocuswright, ITB Berlin, HEDNA Global Distribution and others.
- Winding Tree was covered in 100+ notable travel tech and blockchain publications including Financial Times, Investing.com, Forbes, CoinTelegraph, Fox Business, Phocuswire, Skift and others, reaching over 250MM readers worldwide.
- In October, a segment on Winding Tree & Travel Industry was aired on Fox Business.
- In November, Winding Tree received Innovation of the Year award from CAPA Centre for Aviation.

ICO

- We raised 16,278ETH from over 7000 backers & 25 million LIF generated during Winding Tree ICO that took place Feb 1–15, 2018.

Team

- In 2018 we have added 7 team members — core developers, project leads and community managers.

For what's next, check out [2019 Q1-Q2 Roadmap](#) and make sure you're subscribed to our [community newsletter](#) to stay in the loop about upcoming announcements and events. As always, your feedback and thoughts are very welcome — drop us a line in [Telegram](#), talk to our developer team on [Gitter](#) and join our platform discussions on [GG](#).
