We are coming close to finishing the new version of the Winding Tree Contracts. In the past few weeks, we have been adding airlines contracts to the ZeppelinOS library. The ZeppelinOS Library will allow us to have upgradeable contracts. Ultimately, this will simplify deployment of new changes on the contracts. Prior to this change, everytime that we wanted to change something in the contracts we had to deploy a new one and notify Winding Tree users of the new address. With this change, the smart contract will always be the same and any new changes won't cause conflicts with previous implementations. You can see the pull request [here](#).

In addition to the above, we continue to work on and getting closer to finishing the Airline Platform PoC. You can see where that is at [here](#).

Thank you for your continued support and patience! If you have any questions, join our [Telegram](#), any technical discussion should go to our [Google Group](#). If you want to contribute, a good place to start is our [GitHub](#).
