279

We have finished merging the Airline PoC data specification. This will that the work on the Proof of Concept is coming to a completion and that our APIs are slowly getting support for that as well.

All of our APIs are now published apart from [Dockerhub](#) and on [NPM](#) as well. Running your own instance for testing, with Node 10, is now as easy as it can get: `npm i -g @windingtree/wt-notification-api && WT_CONFIG=playground wt-notification-api`. There are still some bugs but we are working on fixing them and should have them resolved soon.

The highly sought after feature finally landed in [Write API](#). You will now be able to register hotels only with the URI. Meaning, you won't have to pass all of your data to it, if you have other infrastructure for data distribution in the Winding Tree data format.

Thank you for your continued support and patience! If you have any questions, join our [Telegram](#), any technical discussion should go to our [Google Group](#). If you want to contribute, a good place to start is our [GitHub](#).
