We are currently investing our time to some hotel platform refinements. You can track all of our progress here in this [GitHub Project](#).

We recently changed how we are building all of our JS libraries, ([wt-js-lib](#)s, [wt-pricing-algorithms](#)). There were some mistakes made in the version scheming so those are being corrected. If you used it in a NodeJS environment, a slight change might be needed in your imports `const {'wt-js-lib`s': WTLibs} = require('@windingtree/wt-js-libs');

Thank you for your continued support and patience! If you have any questions, join our [Telegram](#), any technical discussion should go to our [Google Group](#). If you want to contribute, a good place to start is our [GitHub](#).
