We are continuing to make progress on refinements to the hotel platform. You can see all of this progress on our GitHub project [here](#). Unfortunately, with this, there are some breaking changes. We have made changes to the [address format](#), as well as, the [rate plane modifiers](#) have been extended in a non-backward compatible way. We expect to be able to showcase everything in the hotel explorer in the coming weeks.

Thank you for your continued support and patience! If you have any questions, join our [Telegram](#), any technical discussion should go to our

Google Group. If you want to contribute, a good place to start is our GitHub.
