Winding Tree

Weekly Development Update 2/25 to 3/3

Spencer · Following

Published in Winding Tree · 1 min read · Mar 4, 2019

We are excited to be finalising our next platform release you can see that outlined [here](#).

We have also begun to change our library build system from [webpack](#) to [rollup](#) where it's possible. This change will allow us to build for more Javascript varieties and ideally, the packages will work for both server-side and browser environments.

The API distribution through NPM has gotten to the next level and we will now publish develop versions! You can play with any WT API in its cutting edge versions with `npm i -g @windingtree/wt-notification-api@develop && WT_CONFIG=playground wt-notification-api`

Thank you for your continued support and patience! If you have any questions, join our Telegram, any technical discussion should go to our Google Group. If you want to contribute, a good place to start is our GitHub.
