Weekly Dev Update 4/8 to 4/14

Spencer · Following

Published in Winding Tree · 1 min read · Apr 16, 2019

129

This week our biggest focus was around the spam protection for the platform. We are breaking that down into smaller pieces to make it easier to work through. We anticipate having a more technical description in the coming weeks on the blog to break it down further. We have started some work on the smart contract portion of it that you can see here, there will probably be frequent changes in the coming days. We are considering a system with Lif staking or deposits, we are working hard to sort out all of the details as this is a complex project to solve.

The platform upgrade on April 11th went smoothly. Part of this was the deployment of the upgradeable Winding Tree Indexes for Hotels and

Airlines. The Airline index is also for the first time available through our [APIs](#) in both the [playground](#) and [demo](#) environments, so you can start working with it if you like.

Do you have something to add or would you like to ask about more details? Join our [Telegram](#), any technical discussion should go to our [Google Group](#). If you want to contribute, a good place to start is our [GitHub](#) and [Developer Portal](#).
