Join business teams from airlines, hotels, travel startups & software vendors to work on Proof-of-Concept proposals — **no coding or technical background required!**

Following the success of our [#HackTravel Prague hackathon](#) we're excited to kick off a brand new addition this year — **Business Hackathon at [#HackTravel Lisbon](#) (July 3–5).**

#HACKTRAVEL HACKATHON

July 3-5, 2019 • Lisbon, Portugal

In Prague, we witnessed a great deal of interest and eagerness from business teams to take active part in defining solutions to the most pressing industry distribution challenges. The classic hackathon format, however, requires technical output which undoubtedly limits business experts' role to a purely consulting one. We saw it as a missed opportunity for the entire industry. In Lisbon, our goal is to enable our community to take full advantage of the **collective business expertise**, putting it to work via creation of **Proof-of-Concept proposals** alongside technical hacks.

After all, collective intelligence and opportunity to cross pollinate business use cases is exactly why companies like AirFrance-KLM hacked with us.

How To Participate

[Apply here](#) and we'll send you links to get your business tickets. Spots are limited & early bird tickets (\$250) are available till June 10th. **BONUS:** if you're bringing your technical team with you to hack (at least one developer) — you'll get your business tickets at 50% discount and your developers will be joining at no cost with hacker tickets. All participants are guaranteed thorough training, consulting & facilitation from Winding Tree team.

Who Should Participate

You will benefit the most if you are:

- business / product team representative from an airline, hotel or travel software development company
- CEO/leadership/business/product team of a travel startup & OTA
- independent travel industry expert
- developer / technical team that wants to maximize their experience at the hackathon and get access to business insights (hacker ticket holders get access to the entire program at no cost)

Why Participate

- bring your business needs to the table and leverage collective expertise from fellow business teams and Winding Tree mentors to define real world Proofs-of-Concept addressing your business goals.
- leverage Winding Tree developer community expertise — offer your Proof-of-Concept ideas to the hackers as a challenge to work on.
- leverage complimentary training & educate your team on what decentralized solutions can do for your business.
- experiment with different solutions / approaches and get immediate validation & feedback from our team.
- learn what Proofs-of-Concept projects other businesses are working on & how Winding Tree platform is solving their business goals.

What To Expect

- Business hackathon portion starts on July 3, preceding the technical portion on July 4 and allowing non-overlap time for those who want to take part in all hackathon activities (business portion, training, talks and technical portion) Business participants are encouraged to use both July 3 and July 4 to work on their business proposals and present those to the community at the end of July 4.
- On July 4 every business hackathon participant will have the opportunity to offer their Proof-of-Concept ideas to the hackers to tackle.
- Full program schedule is coming up. All ticket holders get access to all hackathon activities.
- Business hackathon will be facilitated by our team. We will provide all necessary info, templates and demos from existing Proof-of-Concept projects being executed by our partners for your reference and inspiration.
- Desired outcomes — detailed and thorough Proof-of-Concept proposal writeups focusing on business needs and goals, expected ROI, success

metrics, potential implementation scope & roadmap, etc. — all the good stuff business folks are already familiar with. As mentioned, no technical skills necessary.

- What kinds of ideas should you tackle? You are welcome to work on your existing business needs and come up with Proofs-of-Concept to solve those or you can also use one of Winding Tree Official Hackathon Challenges — we'll have challenges airlines, hotels, OTAs and software vendors (will be announced shortly)

. . .

Get your tickets while we still have them — [apply here](#). To see what our hackathons are like — check out [this playlist on YouTube](#). For any questions — feel free to reach out to marina [at] windingtree [dot] com.

Looking forward to hacking with you in Lisbon,

The Winding Tree team.
