Here are some of the things that we have been working on so far this month:

- We have some great progress on the inventory front. We are getting close to integrating some more content into our platform. This will greatly

expand the inventory accessible to anyone wanting to solely use the Winding Tree platform.

- We have heard the feedback from our community and we are getting close to a solution that will greatly simplify the onboarding process for organizations. This will make interacting with Metamask and acquiring the necessary Ethereum to interact with the Winding Tree smart contracts a lot easier.
- We did some housekeeping to the infrastructure of the Winding Tree Marketplace that will help it run a little bit smoother.
- We made some progress on some of the technical work needed for integrating with Kleros, which brings us a bit closer to seeing the fruits of that partnership fully realized.

User Feedback

We continue to have open ears to any feedback you may have, please do share if there is something that you think needs some attention. We have gotten feedback surrounding the unfamiliarity with using Metamask and are currently making great progress in resolving this issue. You can also expect to see us provide more educational materials to ease any organization's ability to include blockchain-based technologies.

Sign up to our newsletter to stay up-to-date with the latest. We have many exciting announcements coming in the next few months!
