We are excited to announce that it is now possible to trade LIF on [Uniswap](#) thanks to their new [Token Lists feature](#). This is a new feature that fits right in line with our ideology on a fully decentralized future for travel. Token Lists improve discoverability and trust in ERC20 token lists in a way that is inclusive, transparent and decentralized.

You can find the LIF token on 3 different lists:

- [Kleros T2CR](#): A default list on Uniswap
- [CoinGecko](#)
- [Winding Tree Custom List](#): you will need to paste this link in Uniswap to add it as a list.

We plan to have it added to more lists in the future to increase its chances of being discovered as well, so stay tuned.

This isn't just for trading though. This is a crucial step in the platform being successful as well as the Uniswap interface is simple and easy to use for anyone. We are thrilled to have the LIF token accessible there and glad that we could offer additional trading options to our community of supporters. To help with this end we also pooled some LIF tokens to support liquidity for trading.
