Introducing ORGiD Bot

Say Hello to ORGiD Bot.

Winding Tree is a foundation centered on Travel Tech. It's our main goal and where our team's collective talent is the most qualified. One of our favorite pieces of technology we have created so far is ORGiD. In a decentralized marketplace, businesses need a way to do business with people where they can determine who is trustworthy and who is not. This is the central purpose behind ORGiD, business identity in a trustless world.

However, as a blockchain foundation, we are frequently faced with unique problems. One particular issue that we face is one that nearly every blockchain organization faces at one point or another — Cases of stolen identity by scammers. Go to any community channel in the blockchain space

and you will find a message or a disclaimer somewhere that states, “Our team members will never reach out to you for personal details”.

It is endless. We have been around for nearly four years and the scam attempts never stop. It is a barrier to entry that every newcomer to the cryptocurrency space faces, and one that they all too frequently learn about in a painful way.

Introducing ORGiD Bot. It can be found under the Telegram handle of “@orgid_bot”. The ORGiD bot is a simple extension of the existing ORGiD standard with a few tweaks. Starting now you can add your authorized organizational representatives to your ORGiD for verification purposes. Once this is done community members or other business people in the blockchain space can query that Telegram username to the ORGiD bot for verification.

If the ORGiD includes the Telegram handles the bot lets you know and you can interact safely knowing they are an authorized representative of that organization. If they are not part of any known ORGiDs the bot will tell you and you can go from there.

ORGiD is a near limitless piece of technology with its potential applications and you may find someday that other new features or utilities are added in conjunction with it that further enrich what it can provide.

Want to learn more about the technical details of ORGiD? You can do so [here](#) and [here](#). Have any feedback about ORGiD bot you want to share? Do so [here](#).
