We are thrilled to announce our partnership with American Airlines. This connection was made on behalf of one of the world's largest corporate travel buyers. It marks the first use case for a corporate travel buyer via a

decentralized marketplace like Winding Tree (powered by Ethereum). What is more, this marks a critical victory in the long struggle to seed a two-sided marketplace.

This partnership will enable corporate buyers to access American Airlines' data on flights directly without utilizing any intermediaries. This is radically different from aggregators and other channels they would have previously used. This corporate buyer is leveraging the power of open-source software to disrupt legacy intermediated travel distribution, reducing the cost to buyers and sellers while improving functionality for all parties.

American Airlines now has much more flexibility in how they package and offer to the corporate buyer. But this is only the beginning, we already have the next suppliers wrapping up their integrations, and you can expect we'll be announcing them in the near term.

It has taken time to build the marketplace and craft the story, but today, the Winding Tree Decentralized Travel Marketplace is ready for all to use.

The Decentralised world is upon us, or web 3.0 ~ buying travel is no exception. Those resting on the laurels of yesterday's web 2.0 will struggle to keep up in the web 3.0 world of today. This first announcement is a call to action for corporate buyers and suppliers to join the change. Detrvl (decentralized travel) is here to stay.

Along with Air Canada, American Airlines are the airlines that have taken the next step in genuinely decentralizing travel and building a brighter future for the travel industry. We are excited to stand alongside them and help usher in this new era for the travel industry.

Are you interested in joining the marketplace? Signup for your ORGiD [here](#). [Sign up for our newsletter to stay up-to-date with the latest.](#)
