Winding Tree

New plans, new people, new brand

The year 2022 brought many new ventures for Winding Tree. We have ambitious plans, various activities and good news for our community.

From B2B to B2BC

Both target audiences are interesting to work with. Our customer development researches show, that both are interested and are eager to participate in shifting the whole travel industry into new decentralised rails. Sounds challenging, right?

Blockchain events strategy

After two years of lockdowns and restrictions, the necessity and desire to move around the world, to meet people and interact IRL is huge. Everyone who has Travel in their DNA is keen on taking ‘revenge’ and can’t wait anymore. We are no exception.

It took us some time to create our most recent venture, we are beyond excitement to share it with the community. Welcome to our roadmap, in fact, in the most literal way. **It stretches from Amsterdam to Bogota with stops in Prague, Milan, Paris, Lisboa and other cities.**

The cities above have been chosen according to one particular reason: they will host events devoted to blockchain and people traveling from all over the world. People that have crypto and are willing to use it as payment method.

Winding Tree has been working hard to provide this opportunity. After more than 2 years there is demand from the market and we will take advantage of this momentum. The entire team is happy to share we now can onchain local accommodation providers with smart-contracts and let attendees of the conferences book their accommodation with stablecoin 'DAI'. *Soon there will be more cryptocurrencies to pay with.*

Devconnect and ETH Amsterdam 2022

Amsterdam is the first city where we launch our new product «Stay» under the 'Win Win' brand. Right now our branding and marketing teams polish the visuals, while developers bring together smart-contracts and dApps.

During the Devconnect and ETH Amsterdam events we will test and improve, communicate and collect feedbacks, make hypothesis and share our vision on the future of travel. **So if you are planning to be in Amsterdam on the from 17–25th of April 2022 you have two amazing opportunities:**

- to book stays at accommodation providers (with exclusive rates) with DAI and to check in with the NFT;
- to hang out with the Winding Tree community on the 23rd of April at the party we are dropping (number of invites is limited).

To get the offers and the party invitation, please fill out the [Typeform](#). *We did our best to make it a cool one.*

Discord connects

Once again we would like to invite you into our official Discord server, where most of communication with the team and community takes places. For each city event we will make a special sub-server, where you will be able to ask questions, share thoughts and build new connections with people from all over the world who are passionate about traveling and blockchain.
