The first Devconnect in history is over. Winding Tree team is back to building and developing the Win Dapp to prepare it for the upcoming ETH events around the world.

Thanks to everyone who participated in the soft launch. Your precious feedback and the ideas shared will help us shape the future of travel.

Amsterdam

Community first

One of the most exciting things about Web 3.0 is the community. Winding Tree aims at moving into DAO of travellers and services providers. And a huge step in this direction was made in Amsterdam during the first Decentralized Travel Meet-up.

Decentralized Travel Meet-up in Amsterdam

One of the biggest challenges in Web 3.0 is the process of onboarding and education of newbies. Vincent (Accommodation Providers Lead) and Luca (Product Manager) supported our hotel partners and introduced our vision of what marketplaces should be. They explained the basics of blockchain and NFT technologies.

*That was rather a task. Imagine speaking about **crypto, decentralization**, and how to use a **MetaMask wallet** to people that don't have any technical backgrounds.*

No matter how big this gap was, we are happy to confirm, that hotels are interested in direct peer-to-peer transactions with no intermediaries involved. They do want to innovate and move from clumsy old school systems to new opportunities and technologies.

Double Tree by Hilton in Amsterdam

The primary accommodation partner in Amsterdam, DoubleTree by Hilton, agreed to make inventory available for Win to facilitate the first on-chain hotel bookings. This enabled us to save 20 000 Euros for the travellers attending Devconnect conference in Amsterdam.

First 100 nights ever booked on blockchain

Only 3 days before the official start of Devconnect, the Win Dapp was ready for a soft launch. The MVP was absolutely simple. **It enabled on-chain hotel bookings with crypto.** In this particular case, these were facilitated by

Gnosis Chain and the xDai stable coin. Nevertheless, we plan to move the Dapp towards multi-chain solutions.

Even with a bit of a late launch, the ETH community travellers managed to make 100 nights reservations with close to a 50% discount.

We used Winding Tree's Discord as a technical support channel. It worked perfectly well. Together with community members, we gathered a list of bugs to work on and improve the user experience.

20 travellers checked in with NFTs

As crazy as it may sound, Winding Tree made a note in the blockchain history book. Our travellers were the first ever people to check in with NFTs using MetaMask. A **once-in-a-lifetime experience!**

First checkins in a hotel with Metamask wallet

Since it was the MVP, we didn't focus on design and directed our attention to functions. Though, we do plan to provide unique travel experiences using the gamification and collectability of our future NFTs.

4 hours workshop: DAO and governance

Within ETH week in Amsterdam, we held a workshop for travel and Web 3.0 communities. Developers, hotel managers, travellers, bloggers, and crypto specialists all gathered under one roof to discuss the future of travel. Having such a diverse group of people uncovered numerous issues from onboarding and education to distribution and scaling.

20 000 of revenue to the hotel with no commission

Hotels and other travel service providers will be active participants of the DAO. Therefore, we are glad to share their successes as well. These 100 nights created 20 000 Euros revenue with only 1% locked at community treasury.

Hoteliers had a chance to use a tool, which helps them avoid huge commissions from OTA which vary from 15 to 30%. Isn't it a real win-win?

Gratitude

We are absolutely grateful to all the people and communities supporting the ideas and vision of Winding Tree. Special thanks fly to:

- [Gnosis chain](#)
- [Aave Protocol](#)
- [MetaMask](#)
- [Chainlink](#)
- [Devconnect](#)

- Deepwork

New connections after Devconnect

We would like to encourage all the teams working in Web 3.0 to pay attention at Win.So Soon you will have a unique opportunity to book hotels (and flights in the nearest future) on blockchain with crypto for all the team members travelling to conferences around the world.
