WIN Minutes — Issue #2

Travel, meet, onboard, repeat.

July 2022 began with an amazing conference in Barcelona. Despite the bear market and crypto winter, the community was purely focused on building and onboarding new people. No «wen moon» talks. Just build, build, build.

And of course the vibe: solar punk was all over the place 📸

Challenges

For ETHBarcelona Vincent and the business team managed to onboard 6 hotels Which was quite a challenge due to two main reasons:

- High seasons with over 90% of rooms booked;
- Skeptical attitude towards blockchain technology.

By the way the same issues we had with hotels in Paris for EthCc. There were 4 accommodation providers who decided to learn about Web 3.0 and experiment with WIN.

As a result in both cities, we had only 3 bookings. Which is more than 0, but of course less than we expected. Just in case you participated in ETHcc of ETHBarcelona, please help us:

to improve your next Web 3.0 travel experience 🍷

Nevertheless, the outcomes of the conferences were very fruitful, mainly because of new contacts in hospitality and Web 3.0 communities.

What next

Based on the knowledge and experience from the 3 events (Devconnect, ETHBarcelona, EthCc) where attendees could book accommodations with crypto and check in with NFTs, we learned that people are willing to pay with crypto when they travel.

Now we will focus on broadening the geography making the WIN platform attractive to digital nomads.

WT+Simard

Merging the talents of the Winding Tree and Simard teams we will, first of all, have more hands to on-chain hotels in numerous cities and develop strategies, which will help us to gain more attention from the blockchain and travel communities.

At the moment a lot of discussion and work is happening around the structuring of the processes. Cristina took over this role and does her best to organize and align the two teams around the product, goals, and timelines.

Reporting

Parallel to all the activities mentioned above, a very important project was created by Max. Thanks to the questions and requests from the community our founder and SEO compiled a document reflecting the history of the project and all the actions performed by the team.

Based on the recent AMA session and the notes from the discussions on Discord, we will also add more information about finances and the Winding Tree team members.

Clarity and transparency

A huge thank you to everyone active on Discord, Twitter, and LinkedIn. The signals we've been receiving are very clear. The community needs more open and detailed information about the project and the actions taken.

We accept the challenge and will improve the communication across all the social media, newsletters like this (please share your feedback), and regular AMA sessions.

The strategy is being baked at the moment

In return, we would kindly ask the community to be more involved in the life of the project and activities. Recently the 3 members have offered their support:

- **NTL and Paul with community management and growth;**
- **Cmston with product design.**

At the moment we are in touch with them to build the workflow. So don't be shy to get engaged as well 😊

To wind up with the minutes, I'd like to ask if you like this issue. Please give me feedback on Twitter. Let me know which Minute was your favourite, and what you would like to read next month.

Tweet to [@Vovanovague](#) and if you have a fren or followers who would benefit from these insights, I always appreciate the shares. Let your August be amazing! Vladimir ✌️
