The blockchain-powered travel platform that rewards you. Created and funded by the Web 3.0 community.

WIN is the first community-oriented platform developed by Winding Tree. It enables hotel bookings in 50 cities with stablecoins on the Gnosis chain and Polygon (more chains to come).

Sustainability + Smart Contracts

We believe that travelers should have a chance to travel sustainably in a trustworthy and reliable manner.

In order to do so, we've partnered with Toucan Protocol.

After you check out from the hotel booked with our platform you can receive an NFT confirming the amount of carbon retired on your behalf by Toucan's NCTs (Nature-based Carbon Token)

Or... you can claim Lif tokens while booking a hotel and shaping the future WIN DAO and voting on what the platform will look like.

 [How to book guide](#)

Web 3 Solutions

How can we change something as big as the travel industry? Step by step. The way from Web 2.0 to a Solar Punk future is long and challenging. Hoteliers are not ready to get into the emerging Web 3 world for various reasons.

One simple one: They need proof that people will book with crypto. WIN is a way for the Web 3 community to show the power of peer-to-peer connections. This will have a huge impact on both sides: the traveler and the accommodation provider.

Community

But first things first. Let's create the demand! The first travel platform operating on smart contracts is live. It is time to show the power of the Web 3.0 community. Especially today, after the successful merge of Ethereum!

Share this info with your community and book your next adventure with WIN!
