Happy Friday frens!

Behind every good, service, or anything that is ever made is people that we never see.

When we eat at a restaurant, there's always a team at the front of the house who we interact with but 9 times out of 10 we never directly communicate with the other half of the team: the chefs.

Winding Tree has an incredibly diverse, talented, and multifaceted team. **You will never guess how many cultures are gathered under the roof of our company.** Somehow we missed this fact in our communication.

Now we are going to improve this and share with you the stories of people behind the hard work on the dapp!

We'd first like to introduce Eugene — one of our amazing developers. But let him talk for himself:

Eugene: *I'm 30, and I'm from Almaty, Kazakhstan. I have been working in IT for over 8 years, and in programming for 4 years. I develop the backend and the front end.*

Q: Okay awesome, outside of work what do you like to do?

Eugene: *[Some of my interests are] cars, good movies, rock music, playing the guitar, and [singing]. [Also] I snowboard, play basketball, love mountains, and*

travel.

Q: That's quite a range of interest. So why web3? What brings you into the space?

Eugene: *I love new technologies, it's very cool that absolutely everything is open and decentralized, I think that the future lies with such technologies.*

Q: And that brings us to our last two questions: What do you do at Winding Tree and why WT?

Eugene: *I develop the backend part of applications. [What I like is the] great positive team, free work schedule, and remote work, it's very cool to be a technology pioneer.*

And that's Eugene in a nutshell! We didn't want to take any more of his time while he works on the upcoming features of the [win.so](#) platform. Let me remind you, that on the Winding Tree discord channel you can address questions to any team member. Links are 👉
