The 🦸 of the month is back, new product features 🚀, dynamic road 🌐

October is over and a new issue of WIN Minutes with news and updates from the Winding Tree team is live. Let's go 🎃

Vladimir, Marketing Lead at Winding Tree

THE DAPP

99% of the time the team spends on the dapp. If you missed somehow the previous updates, back in August we launched the beta.win.so the platform where travelers book hotels worldwide with stablecoins on two blockchains (Gnosis and Polygon) and get either Lif or NCT tokens by Toucan Protocol as rewards.

*Back in September, we tested the dapp with the teammates going to conferences. This month we had the first Group booking made for the **Kleros** team visiting Devcon in Bogota. It was an interesting experiment, with a number of insights to discover and implement into the product.*

Together with **Smart Token Labs**, we developed an interesting tool to enable Devcon attendees to redeem conference tickets on our platform and get cashback for hotel bookings. This feature needs more time to be fully available on the platform. It will help event organizers leverage the technology and create some cool Web 3.0 experiences for the attendees.

In October WT devs have been working on the following updates:

- *making the home page and search page mobile-friendly;*
- *displaying cancellation policies;*
- *facilitate group booking.*

These features are partially live. Within the following weeks, they will be fully available both on desktop and mobile versions. So in case, you start planning team trips for 2023, we are here to help you get the best offers in comfortable hotels for USDC and other stablecoins. Within the previous month, we had **127 room nights booked** through the platform. Which is a good start for now.

Recently we shared an article, about the process behind Group Booking mode. Sincerely recommend reading it. ▼

🟡 Group booking with WIN is a perfect Web 3.0 solution for the team traveling a lot and running accounting in crypto

BUSINESS & PARTNERSHIPS

The partnership team has been working hard to acquire new content sources and business collaborations. We have nearly finished researching the documentation of a PMS integration that will allow us to source as directly as possible. More on that in the upcoming newsletter.

🟡 Now the platform has access to the content of 300 000 hotels located in 100 countries worldwide.

The continuous realization is that we are changing a paradigm here, and as with every innovation, some doors close and others open. We will not back down from our efforts to effect change. We've reached the point where we expect others to follow suit and speed up the process when we soon proceed with pending integrations.

MARKETING & BRANDING

At the moment the marketing team is working on a number of directions:

🔗 building bonds with Web 3.0 teams to have more bookings and feedback on the dapp;

📶 communicating with the event organizers to become official accommodation providers;

🎨 compiling the updated vision of the product to create the visual identity and the brand;

 writing and sharing content on the daily basis (recent post about [crypto-compatible hotels in Lisbon](#));

 getting on podcasts and shows related to travel, Web3, and sustainability.

If you have any good frens running podcasts about the topics mentioned above or any other related to finances, design, coding, or marketing in *English, French, Italia, Polish, Russian, Czech, Dutch, Hindi, Ukrainian, or Kazakh*, share with us their contacts.

EVENTS 2023

Thanks to active community members on our Discord and contacts made on the recent Web 3.0 events, we have a list of partners to make for 2023. Together with the solution created by Smart Token Lab for Devcon in Bogota and possible integration with Tacit on-chain affiliate program WIN can offer unique solutions to engage and gamify the experience of attendees of the conferences.

Ping your contact among organizers for us to create amazing Web 3.0 travel experiences for the frens who travel.

COMMUNITY MANAGEMENT

After some turbulence in the work with our community, we are happy to restart the work with a roadmap [shared](#) and WIPs to be proposed within the upcoming weeks. Strongly recommend joining our [Discord](#) channel to participate and share your feedback.

Community calls are going to be held on a regular basis. The first one we had at the beginning of this month. Below you can watch the previous call.

Winding Tree community call, October 2022

The next community call will take place on Friday and will be devoted to the recent Report shared. Please set your 🕒 and share your questions.

Date: 04/11/2022

Time: 4 pm CET

Place: Discord

THE HERO OF THE MONTH 🦸

One of the core values of our team is **diversity**. Being a fully remote team we are spread around the globe and speak a lot of languages. Such a vast palette results in POV and solutions we implement. Therefore we are happy to introduce to you the people behind the project daily working on tasks to bring all of us closer to the decentralized travel distribution we all dreaming of.

Today our guest is Valerii — a software engineer. The recent 8 months were extremely challenging for him and his family. As you might have already guessed, Valeri is located in Ukraine. Hence he had to change a number of locations to find a safe place for his family. **And this is his story** 🙌:

. . .

📖 So, I have been programming for a long time. I got interested in computers at 12. Since then have been learning on my own everything from bits & bytes to how quantum computers work. Specifically for the last 10 years, I have been in the web development industry.

Started from simple HTML sites, and ended up creating complicated systems spanning multiple backend services and some funky UI applications.

A new page

With WindingTree I have been for a bit more than two years now. I remember that when my kid was about to be born, I started seriously looking for a freelance gig so that I could be around the house for the first couple of months to help out my wife if necessary.

So I joined WindingTree, and a few months later came the kid. When I joined the project, I had some experience with blockchain-type solutions. When I learned that WT was prototyping the vision for the next generation of travel, I got hooked.

Hooked

The idea was promising, and the team was very keen on seeing it live and succeed. It was a very energetic team and I fell in love with the project. I came on board as a full stack with a SysOps and a DevOps background. So I could help out in all areas of development.

I also could learn a lot as well, since people in WT are very knowledgeable in the area of blockchain. All this time I am working with the team, I have been doing a decent share of backend and frontend development. I think my experience in these fields really helps, my skills bring to life the ideas from our creative leadership.

Working remotely

Since I joined the company I have been working remotely. No matter what challenges the world brings, the team just keeps pushing forwards. First, it was the Covid-19 fiasco, which basically made the whole world slow down. *Now, it's the war in Ukraine*, which affects me and my family very much since we live in Ukraine. But I believe that all hardships pass someday, and that good will win.

You just have to do your thing and don't stop. I think that we have a lot to give this world. And I am happy to be with my team and to bring the project to the top. To the giants!

. . .

Right now when this newsletter is being ironed, we are expecting some exciting news from our founders. Both are busy with fundraising. Max is targeting a Web 3.0 community of investors ready to support the development of public goods. Pedro is going through meetings with traditional VC funds.

● Remember, that we share the latest update on our socials: [Twitter](#) and [LinkedIn](#).

If you have any feedback or ideas to improve the WIN Minutes, hit the “reply” and share your thoughts. I follow all the comments on socials.
