JUNE UPDATE 2023

BUILDING TOWARDS A SEAMLESS TRAVEL EXPERIENCE

We are thrilled to share the remarkable advancements made in June 2023 as we march closer to achieving our vision of revolutionizing travel

distribution. This progress report highlights the notable developments and sets the stage for the exciting roadmap ahead.

Refactoring and Stabilization:

This month, our focus has been on extensive refactoring and stabilization of the core Protocol SDK, laying the foundation for our upcoming beta release. With the addition of over 15 valuable pull requests to the SDK repository, we are making significant strides in enhancing the stability and functionality of our protocol.

Updates and Improved Test Coverage:

Both the protocol node and client have undergone substantial updates, paving the way for full-cycle end-to-end test implementation. We are delighted to share that our code test coverage has more than doubled, skyrocketing from 30% to an impressive 65%. This achievement reflects our commitment to delivering a robust and reliable solution.

Enhanced Application Examples:

To provide a tangible demonstration of our capabilities, the application examples within the SDK repository now showcase comprehensive deals management functionality from the client's perspective and partially from the supplier's side. This advancement brings us one step closer to realizing a seamless and efficient travel experience for all stakeholders involved.

Roadmap for the Next Month:

Looking ahead, we have an exciting plan in place for the upcoming month. Our primary focus will be on broadening the supplier's side deal management functionality, encompassing critical aspects such as check-ins, check-outs, and refunds. These enhancements will be implemented in both the protocol node application and the web application for the supplier's

manager. Furthermore, we are committed to expanding our end-to-end testing capabilities, ensuring a seamless server-node-client flow. To fortify the quality of our solution, we aim to increase the unit test coverage to an ambitious 80%.

As we forge ahead, building a decentralized and transparent travel distribution ecosystem, we extend our gratitude to our supporters and collaborators who have played an integral role in our progress. Stay tuned for more updates as we continue to refine and enhance our protocol. Your unwavering support and involvement are instrumental in shaping the future of travel distribution. Together, we are transforming the way the world travels 🚀❤️
