WindingTree's Liquidity Pool: A Gateway to Seamless Travel Transactions

Mokhi · Following

Published in Winding Tree · 2 min read · Oct 3, 2023

WindingTree is on a mission to revolutionize the world of blockchain and decentralized travel. In our latest update for September 2023, we're thrilled to share our progress in building the Liquidity Pool Protocol, a game-changing solution that bridges the gap between traditional travel and blockchain technology within the WindingTree Market Protocol.

Building Blocks: Code Quality and Stability

Before we dive into the exciting world of Liquidity Pools, let's talk about the foundation. At WindingTree, we believe in rock-solid code and system stability. So, we started September by putting our SDK code to the test — literally! We've reached an impressive milestone with over 90% test coverage. This means our code is robust, reliable, and ready to take on the future.

Introducing the Liquidity Pool Protocol

Now, let's talk about the star of the show — the Liquidity Pool Protocol.

Imagine a world where you can seamlessly exchange travel-related assets and traditional currencies. That's what this protocol is all about — making it easy for you to move between the travel industry and blockchain-based solutions.

Key Features You'll Love

- 1. Hybrid Transactions:** Say goodbye to complicated processes. With our Liquidity Pool, you can request a payment for your travel needs, and if there's enough in the pool, we use the Stripe API to process your payment while handling your travel-related assets. It's like having the best of both worlds!
- 2. Cash-out Requests:** Need cash for your travels instead of travel assets? No problem! Travel service providers can convert travel assets to fiat by simply sending a cash-out request through our smart contract. It's your money, and we're here to help you access it when you need it.
- 3. Effortless Cash-outs:** We've made the cash-out process seamless. Our Liquidity Pool operator keeps an eye on the cash-out queue. When they spot a new request, they facilitate the conversion from travel assets to fiat. It's quick, easy, and hassle-free.
- 4. Rewards for Everyone:** To sweeten the deal, we've introduced a rewards system. We calculate rewards based on regular system snapshots, considering factors like your travel assets' size and how long you've been in the pool. It's our way of saying thank you for being a part of the WindingTree community.

The WindingTree Liquidity Pool Protocol is your ticket to a world where travel and blockchain technology come together seamlessly. We're excited about the possibilities this protocol brings to the world of travel, and we're committed to making your travel experiences smoother than ever.

Stay tuned for more updates as we continue to push the boundaries of what's possible in the travel industry with blockchain technology. Your travel adventures are our mission, and we're just getting started 🚀
